KE and CMW visited the property at 1:15 PM on 04/20/2016 and found a group of 4 workers demolishing the trailer. The supervisor came up and introduced himself and then offered to show KE and CMW the completed asbestos survey of the trailer. The survey was completed by Lodge Environmental Inc. and showed NAD for the samples taken of the walls, ceilings, flooring and roof.

A picture of the asbestos survey results is on record.
